Supporting better quality health and social care for everyone in Scotland is the aim of Healthcare Improvement Scotland.

Working with people at every level of the health and social care system, we make sure improvements in care are informed by the experiences of people who deliver and people who use services.

We have five key priorities. These are areas where we believe we can make the most impact and where we focus our efforts and resources.

1. Enable people to make informed decisions about their care and treatment.
2. Help health and social care organisations to redesign and continuously improve services.
3. Provide evidence and share knowledge that enables people to get the best out of the services they use and helps services improve.
4. Provide quality assurance that gives people confidence in the quality and sustainability of services and supports providers to improve.
5. Make the best use of resources to ensure every pound invested in our work adds value to the care people receive.
